TANK STORAGE

CONFERENCE & EXHIBITION 2026

www.tankstorage.org.uk

“As we collectively look to the future, we want to see a sector thriving, growing, and continuing to play a vital role in wider industrial competitiveness and the UK’s energy system.

We are committed to working in partnership to ensure that ambition is realised.”

#TSA2026

Message from our President

Dear Delegates and Exhibitors,

Today, I have the honour of welcoming you back to the Coventry Building Society Arena for the twenty-fifth edition of the Tank Storage Conference and Exhibition, the UK’s premier event for the bulk storage and energy infrastructure sector. The event continues to provide one of the best opportunities for those interested in safe, compliant and efficient bulk storage operations to come together to be inspired, share knowledge and network.

This year’s programme features an exceptional lineup of speakers sharing valuable insights on global trends, international trade, supply security, the energy transition, safety leadership, and more. Our special panel session, ‘Powering the Future: Leading Through the Energy Transition’, brings together industry experts to discuss the innovations, strategies and collaboration driving opportunities today and well into the future.

In an increasingly complex and evolving geopolitical landscape, the sector continues to play a vital role in ensuring the safe, efficient, and reliable movement and storage of essential products and must therefore be recognised as system critical. Our industry plays a vital role in supporting international and regional supply chains, as well as domestic industrial ecosystems, ensuring they operate reliably and cost-effectively. From manufacturing and chemicals to healthcare, steel, construction, food production, agriculture and automotive, key sectors across the economy depend on the bulk storage and energy infrastructure industry as a critical enabler. In this context, the Tank Storage Association continues to advocate for clear action to ensure that the infrastructure underpinning this reality is given the value, support, and strategic recognition it rightly deserves. As we collectively look to the future, we want to see a sector thriving, growing, and continuing to play a vital role in wider industrial competitiveness and the UK’s energy system. We are committed to working in partnership to ensure that ambition is realised.

Thank you for joining us today and I hope you enjoy the 2026 edition of our Conference & Exhibition.

Arun Sriskanda
President – Tank Storage Association

MULTI-DISCIPLINARY ENGINEERING & DESIGN

The Limestone Group brings together three specialist engineering consultancies to deliver multi-disciplinary solutions across the tank storage sector.

LIMESTONE

JM Dixon are a Tank & Pressure Vessel Design house, providing detailed design, analysis and fabrication level detailing for Storage Tanks & Pressure Vessel Design.

- Storage Tank Design to API650 & BS EN 14015
- Pressure Vessel Design to PD5500 & ASME VIII
- Tank Repair & Rehabilitation
- Tank & Vessel Specification and Detailed Design

BC&T Consultants provide Multi-Disciplinary Engineering & Design across Civil, Mechanical, Process and EC&I, Specialising in Petrochemical and Downstream Oil & Gas.

- Civil Foundation & Bund Design
- Ciria C736 Compliance
- Structural Design
- Mechanical & Piping Design (ASME)
- Stress Analysis (CAESAR II)
- Process Design
- EC&I Design

P&I Design specialise in providing Process, Control and Instrumentation Design and Consultancy services.

- P&ID Development
- Process Simulation
- Process Safety Studies (HAZOP/LOPA)
- Functional Safety (IEC61508/61511)
- PLC, DCS, SCADA Software Integration
- C&I Design

Conference Schedule

08:30	DELEGATE REGISTRATION OPENS
08:30 – 10:00	Exhibition & Coffee
10:00 – 10:10	Introduction by Arun Sriskanda, President, Tank Storage Association
Morning Session	Introduction by Conference Chair, Greg Emmenis, Publisher, Storage Terminals Magazine
10:10 – 10:50	Evolving requirements for the storage sector: how the energy transition and supply security concerns are shaping the future role of bulk liquid storage Mark Waddington, CEO, Channoil Energy
10:50 – 11:30	Panel Session: Powering the Future - Leading Through the Energy Transition Matt Wilson, Head of New Energy Markets, Navigator Terminals Edward Gill, North West Europe Communications & Public Affairs Lead, Exolum Kim McCann, Global Energy Advisory Director, SLR Consulting
11:30 – 12:00	Exhibition & Refreshments
12:00 – 12:30	Importance of security of supply to UK defence Major Andrew Clarke - Fuels Infrastructure Specialist, Royal Engineers
12:30 – 14:00	Exhibition & Buffet Lunch
14:00 – 14:30	Avoiding complacency: leadership vigilance in the face of risks arising from major hazards Chris Griffin-McTiernan, Director, Chemicals, Explosives and Microbiological Hazards Division, Health and Safety Executive
14:30 – 15:00	COMAH Emergency Response: Are we prepared for the unthinkable? Chris Jenkins, Deputy Director Energy and Manufacturing Industries, Environment Agency
15:00 – 15:30	Exhibition & Refreshments
15:30 – 16:00	Beneath the Terminal: How NIPA helps operators understand buried pipeline integrity without stopping operations Lewis Barton, Global Service Manager – Non Intrusive Pipeline Assessment, ROSEN
16:00 – 16:05	Closing remarks by Arun Sriskanda, President, Tank Storage Association
16:05	CLOSE

Specialist Inspection Services & Non-Destructive Testing

Our Services Across All Industry Sectors:

Comprehensive Storage Tank Inspections | Heat Exchanger Tube Inspection
UKAS Asset Integrity Management Services: WSE's, RBI, PSSR, Asset Software
Boiler Inspections and R&D Bespoke Solutions
Pressure Vessel and Piping Inspections
Specialised NDT: Phased Array, Corrosion Mapping, LRUT, PECT
Storage Tank Calibration, Laser Modelling and Mapping
Drone UAV Inspections | Rope Access Services

We get the job done right the first time by fully understanding your specific needs and aligning our work with the latest industry standards. Beyond inspection, we provide practical recommendations that ensure your assets remain compliant, safe and performing at their best.

Safe | Smart | Sustainable

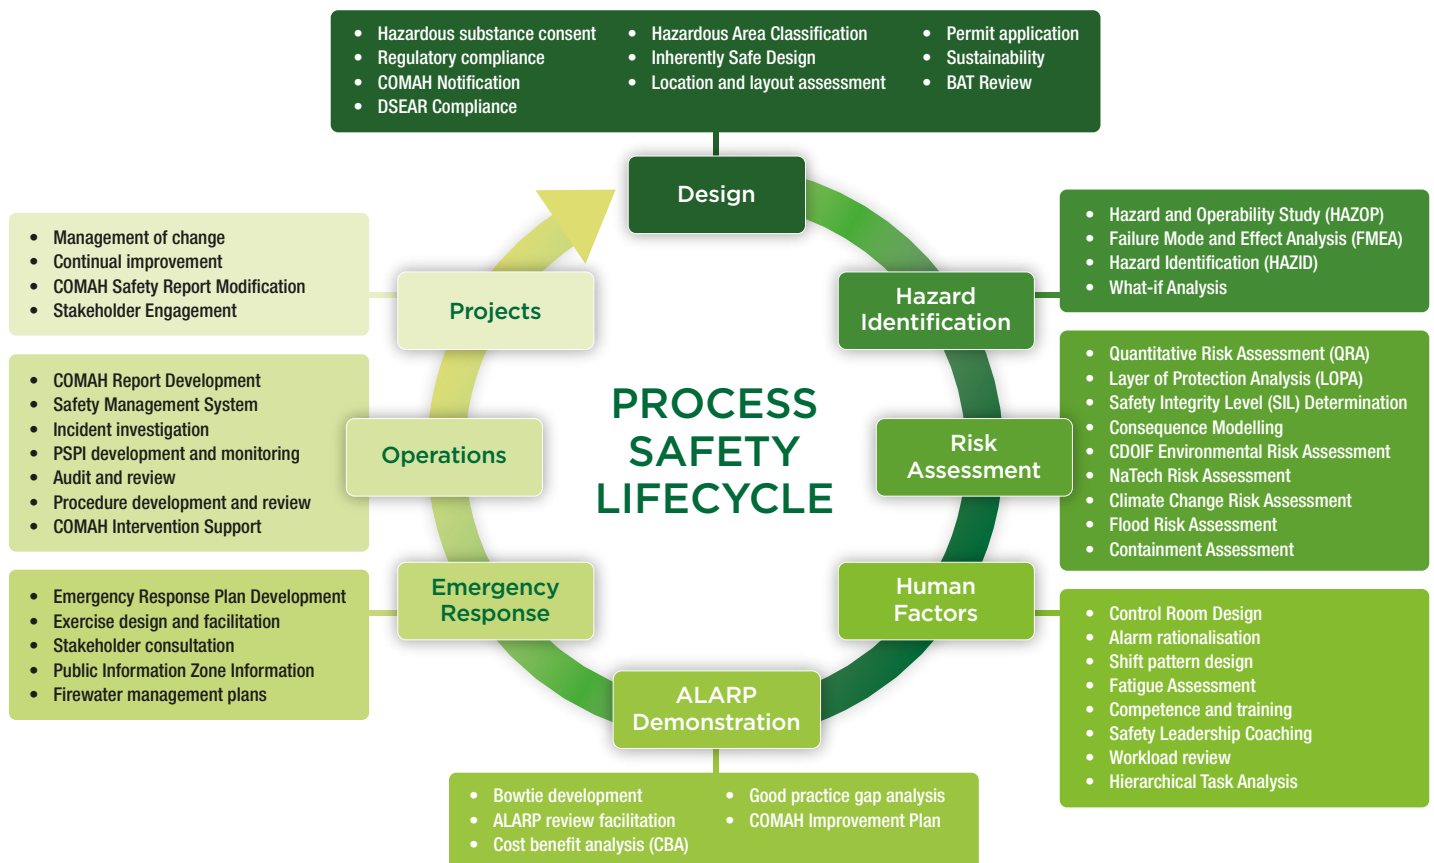

RAS Limited is a well-established, specialist risk consultancy working with an extensive portfolio of large corporate clients which manage complex industrial sites and businesses.

Our team of expert consultants have experience in a wide range of sectors - from pharmaceutical to energy, aviation and specialist chemical sectors.

We are a Chester-based company with a national and international client list. We work differently because of our great team of specialists. Our multi-disciplinary approach to solving challenges enables us to stand out from the crowd. We are passionate about supporting industry to be safer, smarter and more sustainable.

People are the centre of everything we do. We do not believe in off-the-shelf solutions. We partner with our clients to find the best solution for their particular challenges and businesses.

SGS Industrial Services

SAFE, COMPLIANT & SUSTAINABLE TANK OPERATIONS

SGS delivers integrated inspection, maintenance, testing and engineering services that help tank storage operators reduce risk, achieve compliance and maximise asset life.

- EEMUA 159 tank inspections
- Advanced non destructive testing (NDT)
- PRV testing
- PSSR support
- 3D tank calibration
- On-site workshop services

We provide complete asset integrity solutions you can trust.

SGS

When you need to be sure

Non-Intrusive Pipeline Assessment

Data without disruption

Designed for unpiggable and complex infrastructure, our non-intrusive pipeline assessment delivers actionable insight without operational impact. By integrating above-ground survey data with predictive analytics, we provide a comprehensive view of pipeline integrity – evaluating the combined influence of cathodic protection, coatings condition, environmental factors, and material performance.

Our approach translates complex data into reliable condition assessment, strengthening confidence in anomaly detection and supporting targeted integrity management decisions across even the most challenging environments.

Partner with us to enhance
asset safety, lifetime, and performance.

Exhibitor Profiles

A

AJAK Energy - Stand 51

AJAK Energy: Trusted Fuel Logistics Across the UK

AJAK Energy supports businesses throughout the UK with specialist fuel logistics, hazardous waste management and fuel recovery services. From one-off collection projects to ongoing transport requirements, we work with organisations across multiple industries to deliver safe, compliant and dependable solutions. Our experienced team understands the importance of keeping operations running efficiently while ensuring every collection, transport movement and fuel recovery project is completed in accordance with current legislation and industry best practice. Whether you're managing contaminated fuel, planning mixed fuel disposal or looking for a trusted provider to support your ongoing bulk logistics operations, AJAK Energy delivers practical solutions tailored to your requirements.

Whatever your requirements, our focus remains the same - delivering reliable service, protecting your business and helping you manage fuel safely and responsibly.

Visit: <http://www.ajakenergy.com/>

Allied Storage Tanks - Stand 54

Our professional staff have 150 combined years of welding and tank fabrication experience. Our customers include a variety of global companies and are leaders in the chemical, fuel and water industries, amongst others. Our experienced and fully trained site team can help if your tank application is too large to be moved by road. Working with Allied means you can rest easy, knowing that all of the details are covered, your project will be made with the utmost focus on quality and will be delivered on time. We are happy to provide seamless engineering services to make the whole process as smooth and efficient as possible.

Our design and manufacturing approach means we give you the ability to select from a number of components and design alternatives that give the right equipment and vessels for your job and the most cost-effective choice for your application. We actively manage your custom tank projects from conception through to completion to ensure that it meets – or exceeds – your standards and is delivered on schedule. We work hard to keep you informed every step of the way.

Visit: <https://www.alliedstoragetanks.co.uk/>

Altrad Motherwell Bridge - Stand 6

With over 120 years' experience worldwide, Altrad Motherwell Bridge are acknowledged experts in the design, construction, maintenance and Inspection of storage tanks.

- Design, supply & construction of new Atmospheric/Low Temperature Storage Tanks
- (API 650, API 620, EN14015, EEMUA)
- Storage tank repair & maintenance
- Tankage Term Contractor
- Procurement and Specialist Fabrication
- Consultancy
- Inspection Services (API 653 and EEMUA 159)
- Storage tank assessments & Scope definition
- Failure investigations
- 3D Laser Scanning
- Design verification

Further, Altrad Motherwell Bridge are leaders in the design and on-site construction of gasholders and gas recovery systems worldwide.

- Design, supply & construction of new gasholders
- Gasholder repair & maintenance
- Supervision and management service
- Specialist Procurement
- Gasholder inspection

Visit: <https://uk.altradservices.com/>

Apave UK - Stand 11

Apave UK provides independent inspection, engineering and asset integrity services to the tank storage, petrochemical, chemical, energy and process industries. Our experienced team supports clients throughout the entire asset lifecycle, delivering practical, risk-based solutions that improve safety, reliability and compliance. Our capabilities include storage tank inspections in accordance with EEMUA 159 and API 653, pressure systems inspections under PSSR, pressure vessels, process pipework, fitness-for-service assessments, corrosion management, risk-based inspection (RBI), integrity management, written schemes of examination (WSE), repair strategies and life extension programmes. We also provide fabrication surveillance, quality assurance, NDT and welding inspections, materials verification, remote visual inspections (RVI) and technical assurance for new-build and existing assets. Our bespoke MTFs inspection management software delivers secure digital reporting, real-time inspection status, asset history, compliance records and complete inspection traceability, enabling clients to manage asset integrity efficiently across multiple sites. By combining technical expertise, innovative digital solutions and independent assurance, Apave UK helps clients protect their assets, maintain compliance, extend asset life and reduce operational risk.

Aquilar - Stand 28

Aquilar specialises in the detection and monitoring of liquid hydrocarbon fuels, providing spill, leak and overflow detection solutions for above-ground storage tanks, buried tanks, valves and pipelines using advanced sensing cables and probes.

At the exhibition, Aquilar will demonstrate the TT-FFS Fast Fuel Sensor, which has seen growing adoption since its introduction 26 years ago. The sensor can detect hydrocarbon fuel leaks within seconds of initial contact, helping operators respond rapidly to potential incidents. The TT-FFS sensor and TTC-1 controller are certified as a SIL 2 system in accordance with IEC 61508. Aquilar will also showcase the TT5000 range of sensing cables, designed to detect liquid hydrocarbon fuels leaking into the soil beneath tank floors or from buried pipes and valves. When connected to monitoring electronics, the system can identify the location of a spill with an accuracy of ± 1 metre.

Visit: <https://www.aquilar.co.uk/>

B

BC&T Consultants - Stand 53

BC&T Consultants is a UK-based engineering consultancy specialising in Design & Engineering for the oil, gas, LPG, LNG, and bulk liquid storage industries. BC&T provides technical and engineering services across the full project lifecycle, from concept development and detailed design through to construction support, commissioning, and operational assistance. BC&T has built a strong reputation in the tank storage and energy infrastructure sector, supporting both greenfield and brownfield developments worldwide. Its core expertise lies in delivering integrated engineering solutions for storage terminals, tank farms, and associated process facilities, often within complex operational environments. BC&T Consultants offers a multidisciplinary engineering capability covering process engineering, mechanical and piping design, civil and structural engineering, and electrical and instrumentation systems. This allows the company to develop fully coordinated designs.

Visit: <https://bct-consultants.co.uk/>

BEKA - Stand 52

BEKA is a friendly, privately owned company that designs and manufactures process displays, indicators and controls for use in hazardous and safe areas. Our products are supported by extensive documentation and a team of experienced engineers. Product innovation is continuous, in addition to an industry standard range of loop powered indicators for hazardous and safe areas, BEKA manufacture serial text (data) and fieldbus displays, totalisers, batch controllers, counters, beacons, sounders, set point generators and panel lamps, all internationally certified for use in hazardous areas. The most recent new product is 'Pageant' a unique intrinsically safe operator panel and PLC with plug-in input and output modules which can be installed in Zone 1 or 21.

Visit <https://www.beka.co.uk/>

Brown & Mason Group - Stand 49

Brown & Mason Group Ltd are at the forefront of industrial demolition, decommissioning, & dismantling, trusted by global leaders in energy, oil, & gas to remove redundant assets and recover materials for future use. With the proven ability to work anywhere on the globe, we have been delivering project success through our team of experts for over 60 years. We have extensive experience in handling complex and high-risk environments, including numerous top-tier COMAH facilities, such as petrochemical facilities and refineries. We're one of the biggest names in heavy industrial demolition & dismantling, specialising in resource reclamation, circular asset return, and recovery of value. Boasting an extensive in-house fleet of machinery and team of specialists engineers, our clients know they can trust us to deliver safe, sustainable, and transformative solutions. We can work independently, alongside in-house teams, and in collaboration with specialist consultants. Together we will unleash your site's full potential.

Visit: www.brownmason.com

Cairn Risk Consulting - Stand 34

Cairn Risk is an independent adviser to developers, owner-operators and technology providers, primarily around the generation, storage, transmission, transformation and consumption of energy.

The energy transition is not solely about clean energy technologies such as renewable energy generation, energy storage and alternative energy vectors like hydrogen. Of equal importance is that fossil fuels continue to meet today's demand as safely, securely and sustainably as possible to create time for new developments to meet net zero aspirations. A vast array of projects in clean energy technologies, oil and gas repurposing and energy security must be delivered to achieve this transformation. All pose significant risks to people, plant and the planet. These risks must be managed effectively to support safe and effective development.

As a result, effective risk management will be a key enabler of the energy transition. Let's talk.

Cogent Skills

Cogent Skills: Skills for a changing world

Science and technology has the power to change our world, transforming our lives in ways few of us ever imagined. Cogent Skills drives, develops and delivers the skills needed to ensure businesses, employees, and industry are future-ready. Prepare for tomorrow with the right skills and capabilities in place today. As specialists in skills for science and technology, we're here to ensure your business, your people and our industry are future-ready. *We are specialists in Training:* Tailored training courses to develop your workforce capability. *Apprenticeships:* Future-proof your workforce. *Employer collaboration:* Working together to address critical skills gaps, influencing the policy landscape for success. *Consultancy services:* A range of specialist services to develop your skills base in high-hazard industries. *End Point Assessment:* Ofqual approved End-Point Assessment. *Green Skills:* Essential skills needed to support the transition to a low-carbon economy.

Visit: <https://cogentskills.com/>

Concrete Canvas - Stand 25

Concrete Canvas® manufactures a revolutionary and award-winning new class of construction materials called Geosynthetic Cementitious Composite Mats (GCCMs). They are flexible, concrete filled geosynthetics that harden on hydration to form a thin, durable, lower carbon concrete layer. Essentially, it's concrete on a roll™.

Concrete Canvas® GCCM (CC) and CC Hydro™ can be used to line bunds, drainage channels and slopes to prevent erosion, weed growth and animal damage. It can be installed at rates of up to 800m² a day and in inclement weather, reducing time required on site and program disruption. CC is hydrocarbon resistant to BS14414 and passed a 56 day immersion test at 50oC. In addition, CC creates no rebound so can be installed around sensitive infrastructure and the hand portable batched rolls allow concrete installation in difficult to access areas without the use of plant, reducing contractor burden and improving safety on site.

Visit: www.concretecanvas.com

Cygnus Instruments - Stand 38

Safe, ATEX-Certified Ultrasonic Inspection for Hazardous Tank Environments

Cygnus Instruments (Stand#38) is a leading provider of ultrasonic testing equipment, offering reliable solutions for corrosion inspection and asset integrity management. Its multi-mode gauges are renowned for ease of use across all skill levels. Inspection of tank farms, pipelines, and loading systems - often in hazardous, hard-to-access areas - demands fast, accurate thickness measurement and safe operation. Purpose-built for hazardous environments, Cygnus 1 Ex is the only certified intrinsically safe ultrasonic thickness gauge for Zones 0, 1, and 2. It enables in-service inspection of tanks, roofs, and pipelines without shutdowns or hot work permits. Certified to IECEx, ATEX, and UKEX standards, it features low-energy electronics, anti-static housing, and fail-safe protection. Cygnus' High-Temperature Ex Probe enables hot-asset inspection, while Multiple-Echo technology reads through coatings up to 20mm. Cygnus Hatch Sure supports fast ultrasonic leak detection on hatches and seals without removing contents.

Cygnus-instruments.com

D

Dabico Airport Solutions - Stand 35

Dabico Airport Solutions is a leading Aviation and Process infrastructure solutions company with over 50 years of experience. The company specialises in designing, manufacturing, and delivering high-quality turnkey solutions that aim to make airports, liquid storage facilities, and process plants worldwide more efficient and environmentally friendly. We manufacture liquid handling equipment suitable for marine, road, and rail tanker liquid handling.

Dabico's equipment solutions includes loading arms for road and rail tankers, marine loading systems, folding stairs for loading bays, packaged skid systems, tank sampling systems, and floating suctions for vertical/horizontal storage tanks. Dabico manufactures in our Stockton-on-Tees production facility and is ISO certified to 9001, 14001, and 45001.

Visit: www.dabico.com

Dantec - Stand 43

Established in 1969, Dantec is the most innovative manufacturer of composite hose for oil, chemical and liquefied gases in the world; exporting products from its UK factory to over 60 countries. Dantec composite hose products meet all major national and international standards and IMO, IBC and IGC codes. All marine hoses meet the requirement of the United States coastguard. Dantec have Type approvals from all major bodies including DNV GL, Lloyds Approval and the Korean Register and produce hoses using the "wet fit" and "dry fit" systems to EN13765:2018 & EN13766:2018. Dantec was the first composite hose manufacturer to achieve ISO9000 status, they are currently certified to ISO9001:2018 and have been registered with the British standards institute since 1988. In 2016 Dantec became part of the Elaflex group with headquarters based in Hamburg.

Visit: <https://dantec.com/>

Dräger - Stand 12

Dräger is one of the leading providers for protection systems in the marine and offshore industry. Our marine & offshore safety systems include mobile and fixed gas detection and protection, escape equipment, dynamic hire solutions and the latest innovations in digital safety guards.

Whether you're looking to hire state-of-the-art lifesaving equipment, need service and maintenance on your current kit (on or offshore) or would like academy training by our approved trainers, at Dräger we pride ourselves in going above and beyond for our customers, to make life just that little bit easier.

Website: https://www.draeger.com/en_uk/Home

E

Endress+Hauser - Stand 56

In the transfer, storage, and distribution of liquids, precise measurement and control are vital for efficiency and regulatory compliance. With intense competition, maximum uptime is essential, as is the safety of personnel and environmental protection. As a leading process automation provider, Endress+Hauser offers tank gauging solutions to enhance performance and safety while reducing unplanned shutdowns and product losses. Their portfolio includes scalable systems for level limit detection, continuous measurement using radar or Servo technology, interface measurement, and density/concentration determination. Advanced communication protocols enable seamless integration with existing systems for remote monitoring and control. Endress+Hauser also provides support services such as commissioning, calibration, MRO, and inventory management, covering the entire lifecycle of instrumentation and automation systems. Their advanced diagnostic tools, predictive maintenance strategies, and remote support ensure optimal performance and compliance with industry standards. We are committed to advancing digitalization through SupplyCare and IMS, while reinforcing our engineering excellence with cutting-edge Panel solutions.

Website: <https://www.uk.endress.com/>

Engineering Solutions & Supplies - Stand 10

Engineering Solutions & Supplies Ltd (ESS) is a trusted UK specialist in industrial maintenance solutions, supplying innovative tooling that improves safety, efficiency and control during maintenance, shutdowns, turnarounds and new build projects. As the exclusive UK distributor for Technom Tooling, ESS provides advanced weld isolation tools and flange weld testers to clients across the energy, tank storage, petrochemical and process industries.

Our proven “plug and play” solutions are designed to reduce downtime, minimise water usage and remove the need for costly full-system filling, draining and drying during pressure testing. This helps operators complete critical works faster, safer and more sustainably. With tooling available from ½” to 42”, backed by strong UK stockholding, technical support and operator training, ESS delivers dependable solutions tailored to site requirements. Our experienced team works closely with contractors, terminal operators and engineering companies to ensure smooth project delivery from enquiry through to completion. At ESS, we are committed to helping industry raise standards in safety, productivity and environmental performance through smarter testing and isolation technology.

Visit: <https://engineeringss.co.uk/>

ESR Technology - Stand 21

We are delighted to confirm our attendance at the TSA Conference.

As one of the UK's leading engineering, safety and risk consultancies, ESR Technology provides pragmatic, independent and specialist support to operators, designers and contractors to manage safety and reliability in all sectors where safety is critical and performance improvement through innovation provides a competitive edge.

Working in partnership with our clients, we deliver a specialist consultancy service. Our core services include:

- Process Hazard Analysis (PHA) facilitation such as HAZID, HAZOP and LOPA
- Duty Holder support for COMAH Safety Reports
- Major hazard Quantified Risk Assessment (QRA)
- Consequence Modelling, including Computational Fluid Dynamics. We employ state-of-the-art tools, techniques and software, many developed in-house by our internationally recognised experts
- Process safety risk assessments and ALARP demonstrations
- Fire Engineering, including 3D fire and gas detector mapping
- Support for energy transition projects including CCUS, Hydrogen, Ammonia and BESS
- Integrity and inspection consultancy services
- Advice on Non-Destructive Testing (NDT) good practice through our joint industry project - HOIS
- Forensic engineering of failed mechanical assets
- Expert witness support

We look forward to welcoming clients and colleagues onto our stand at the TSA Conference.

The UK's leading event
for the bulk storage and energy infrastructure sector

Ethos Inspection Solutions - Stand 36

Ethos Inspection Solutions Ltd is a Scotland-based inspection and integrity specialist, delivering high-quality NDT, engineering assurance, rope access, robotic and automated inspection solutions for critical industrial assets. We support operators across tank storage, energy, petrochemical, nuclear, marine and heavy industrial sectors, providing technically robust services aligned with recognised industry expectations, including EEMUA 159 and API 653. Our capability spans conventional NDT — visual, magnetic particle, dye penetrant, eddy current and ultrasonic testing — through to advanced corrosion mapping, phased array UT, robotic inspection and bespoke solutions for complex access and integrity challenges. Combining advanced inspection technology with practical engineering judgement, Ethos helps clients reduce operational risk, minimise downtime, demonstrate compliance and extend asset life. Responsive, technically competent and solutions-focused, we provide safe, efficient and high-value inspection solutions for above-ground storage tanks, pipelines, pressure systems, heat exchangers, boilers and other business-critical infrastructure.

Visit: <https://ethosis.net/>

ETS Degassing - Stand 4

ETS Degassing is a leading European provider of mobile emission control and industrial degassing solutions for the energy, chemical and tank storage sectors. With more than 3,000 successful applications across Europe and the Middle East, the company delivers safe, compliant and highly efficient services for tank farms, refineries, terminals, and pipeline operators. Its portfolio includes state-of-the-art mobile vapor combustion units (1–20 MW), nitrogen inerting systems, ATEX Zone 0 degassing technology, real-time emissions monitoring and customized solutions that ensure operational continuity while meeting strict environmental and safety regulations.

ETS Group operates from hubs in Germany, the Netherlands, France and Saudi Arabia, enabling rapid deployment and reliable on-site execution. Driven by engineering excellence and a strong commitment to environmental performance, ETS supports operators in reducing VOC emissions, increasing turnaround efficiency and improving overall site safety.

Visit: <https://ets-degassing.com/en>

EWFM - Stand 62

EWFM is a trusted global supplier of engineered solutions for the safe transfer and storage of liquids, gases, and other media. We are committed to delivering exceptional quality, reliability, and performance, backed by expert technical support and outstanding customer service. Serving customers across the UK and worldwide, we support a wide range of industries including Oil & Gas, Chemical, Food & Beverage, Pharmaceutical, Marine, Aviation, and many more. Our product portfolio is designed to meet the demands of the most challenging applications while helping customers improve safety, efficiency, and operational performance. Our product range includes:

- Floating Suction Units & Roof Drains
- Floating Roofs & Storage Tank Seals
- Swivel Joints
- Land Loading & Unloading Arms
- Marine Loading Arms
- Couplings
- Filling & Emptying Equipment
- Safety Access Systems
- Composite Hose

From standard products to fully engineered solutions, EWFM delivers the reliability, innovation, and expertise customers depend on worldwide. Discover more at www.ewfm.co.uk

F

F.E.S. (EX) Limited - Stand 22

F.E.S. (EX) Limited is a leader in Electrical, Instrumentation, and Mechanical services for hazardous environments. We provide flexible standalone solutions or complete turnkey packages, guiding you through every stage: Process Safety → Design Verification → Installation → Testing → Inspection & Rectification → Asset Management → Maintenance → Training → Audit.

Our reputation is built on quality, reliability, and an uncompromising commitment to safety. From SMEs to blue-chip corporations worldwide, we deliver compliance and confidence where it matters most.

Join us at TSA Conference 2026 and discover how our expertise can transform your Hazardous Area Compliance strategy. Let's engineer safety without compromise.

ISO 9001 | ISO 14001 | ISO 45001 | NICEIC Hazardous Area Approved

www.fes-ex.com

Fenelon - Stand 57

The Fenelon tank group are the market leading above ground storage tank manufacturer in the UK. The group is comprised of Fenelon Storage Tanks for new build tanks, Fenelon Tank Repairs for tank refurbishment and our in-house tank design company Tank Design House. Fenelon have a track record second to none, can fulfil all tankage requirements from term maintenance contracts to minor refurbishment work and can respond quickly to all enquiries.

Please see further details at: <https://www.fenelontanks.com/>

Flotech - Stand 33

Flotech Performance Systems provide engineered products, solutions and services for the storage, transfer and distribution of industrial liquids and gases. Our extensive range covers; Additive & Blending, Fluid Transfer, Storage Tank Services, Top/Bottom Loading and Marine Loading Arms, Fabrication and Access Solutions. With locations across the UK, our in-house design and manufacturing ability coupled with the experience and flexibility of our service team allow us to react quickly and efficiently to the needs of our customers.

As part of the Adler and Allan group, we work with them to help businesses tackle five of the world's most pressing environmental challenges with real-world solutions. Through actionable consultancy and expert engineering, we put ESG into action and create measurable impact – protecting the environment, strengthening resilience, and ensuring compliance. Visit: <https://www.flotechps.com/>

Flotech provide full services to the **tank storage** and **terminal industry**, including:

Systems Integration

- Additive & Blending Systems
- Road, Rail & Marine Loading Arms & Systems
- Fuel Loading Systems & Tank Equipment
- Control Systems Integration (SCADA)
- Access Solutions

Tank Services

- Tank Equipment Service & Calibration (Flame Arrestors / P&V Valves)
- Tank Inspection & Repairs (EEMUA / API)

- Meter Proving Services
- Mechanical & Electrical Site Services
- Vapour Recovery Servicing

Fort Vale Engineering - Stand 37

Fort Vale Engineering Limited is the world leader in the precision manufacture of equipment for the transportation of bulk liquids in the tank container, road tanker and rail industries. Transportation of gases/liquids by road, rail and sea must be safe and Fort Vale works with the industry and regulatory bodies so that the quality of its design, materials and manufacture ensures first-class safety. The market leading Safeload range of API couplers and stainless-steel loading arms are the first choice for many oil majors. Our expanding range of products for the Petroleum Transfer Industry includes loading arm, API couplers, check valve and wear gauges.

Safeload delivers the most secure connection with minimum wear to the truck adaptor and is proven to be reliable and very-long lasting in the relentless service conditions of a road-loading terminal.

Fort Vale has the flexibility to design and manufacture bespoke equipment to suit all terminal needs.

Visit: <https://www.fortvale.com/>

G

G R Carr - Stand 8

Based in Essex with a 4.5 acre facility we carry out both off-site and on-site projects across the Oil & Gas, Nuclear, Aviation, Energy, Utilities, and Infrastructure sectors. Services:

- Pipework fabrication and installation – ASME & PED
- Structural Steelwork fabrication and installation – up to and including BS EN 1090 Exc 4
- Tank modification, maintenance & repair – EEMUA & API
- Robotic Tank Cleaning internal and external
- Pressure testing Pipework and Tanks
- NDT
- Abrasive blast cleaning
- Protective Coating/Painting/Lining systems – ICATS & ICORR
- Commissioning; Contract Lifting; Mechanical Plant Installation

Visit: <https://grcarr.com/>

H

Hawkes Fire - Stand 27

HAWKESFIRE is a specialist in firefighting foam systems, bringing over 45 years of expertise in serving high-hazard industries. As the foam market undergoes significant changes driven by evolving environmental regulations, we partner with leading manufacturers to ensure a smooth, compliant, and effective transition for your systems. Our in-house engineering team offers extensive experience and technical proficiency to support every stage of the process.

Whether you need assistance with foam system design, hardware or concentrate specification, or service and maintenance of existing equipment, HAWKESFIRE is committed to ensuring your systems perform reliably, protecting both your people and assets when it matters most.

Visit us to learn more about how we can support your fire protection needs.

Hazchem Safety - Stand 31

Protecting people in hazardous conditions through the manufacture and distribution of specialist Technical Workwear & PPE. Hazchem Safety focuses on protecting people in particularly the Fuel & Gas, Petrochemical, Hazardous Waste & Power Generation industries, whilst also being leading international suppliers of ADR signage and safety equipment.

For more information please visit: <https://www.hazchemsafety.com/>

HMT - Stand 48

HMT is a global leader in aboveground storage tank technology, delivering innovative products and services that improve safety, reliability, and environmental performance. Our experienced team partners with customers to reduce emissions, optimize tank capacity, recover stranded inventory, and extend asset life through advanced engineering solutions. HMT offers a comprehensive portfolio of products, including seal systems, floating roofs, aluminum dome roofs, floating suction and drain systems, and emissions reduction devices, along with design, construction, inspection, maintenance, and repair services. Strategic acquisitions of ALLENTECH and Weld Spec Inspection Services have expanded our engineering expertise and enhanced our inspection, testing, and tank integrity capabilities. With operations across the United States, Europe, and the Middle East, HMT serves a wide range of industries, including oil and gas, chemical, water, mining, food processing, and renewable energy.

Visit: <https://www.hmttank.com/>

IFC Inflow - Stand 20

IFC Inflow specialises in the design, supply, installation and servicing of safe tanker access, fall prevention and bulk liquid loading solutions for the tank storage, fuel, chemical and process industries. We help customers improve operator safety, support compliance and increase operational efficiency through practical, engineered solutions tailored to each site's requirements. Our range includes loading arms, loading skids, loading management systems, flow meters, pumps and couplings, as well as hose support arms, safety cages, folding stairs, gantries, mobile access platforms and our new modular access system. We also offer ongoing servicing, maintenance and inspections to help keep equipment operating safely and reliably.

Whether you're planning a new installation, upgrading existing equipment or looking to improve safety during tanker loading operations, visit the IFC Inflow stand to discuss your site requirements and how we can help improve safety, compliance and operational efficiency.

Visit: <https://ifcinflow.com/>

Inspectahire - Stand 14

Inspectahire is a leading provider of Non-Destructive Testing (NDT) and inspection services, equipment hire and sale, delivering innovative solutions to the tank storage, petrochemical, and energy sectors. With over 35 years of industry experience, we specialize in advanced inspection technologies, including remote visual inspection, ultrasonic testing, thermal imaging, gas emission and drone surveys. Our expertise ensures the integrity, safety, and compliance of storage tanks and associated infrastructure—whether above or below ground. Operating across the UK and internationally, Inspectahire supports clients with EMUUA asset integrity assessments, corrosion monitoring, and shutdown support, minimizing downtime while maximizing operational safety. We pride ourselves on our commitment to quality, fast response times, and tailored inspection programs that meet the specific needs of each facility. As a trusted inspection partner, Inspectahire combines inspection solutions with experienced, certified personnel to deliver dependable insights and actionable data, ensuring assets remain safe, efficient, and compliant.

Visit: <https://www.inspectahire.com/>

Intero Integrity - Stand 1

Intero Integrity is the leading specialist for keeping critical infrastructure clean, safe, well maintained, and highly productive. Founded in 1985, this innovative technology company offers advanced ultrasonic (UT) and magnetic flux leakage (MFL) inspection, environmental, and industrial services. Across the full asset lifecycle, from design and maintenance to end-of-life, Intero helps clients maximize integrity, ensure compliance, and maintain uninterrupted operations. With a strong focus on safety, efficiency, and sustainability, Intero turns complex data into clear, actionable decisions.

Headquartered in the Netherlands, Intero supports projects worldwide with offices in the United States, Canada, Belgium, Brazil, United Arab Emirates, Saudi Arabia, Malaysia, Australia, China, Germany, Romania, France, Italy, Spain, and Serbia. Learn more at www.intero-integrity.com

ISIS Process - Stand 40

An established and well-respected valve supplier for over 35 years, ISIS Process, a division of ISIS Fluid Control Ltd. supply a wide range of high-quality valves ideal for the storage of bulk liquids and gases. ISIS are the master distributor in the UK for the Vinco range of ball valves which are manufactured in Portugal and are designed for industrial fluids, including a range specific for both Hydrogen and Cryogenic applications. The Vinco ball valve range includes floating, trunnion and DBB ball valves which are available in various materials and pressure ratings from Class 150 to Class 2500. To complement the Vinco ball valve range, ISIS supply a broad range of other valves and pipeline ancillaries such as gate, globe and check valves, plus high-performance butterfly valves, modulating control valves, pressure regulating valves and safety relief valves among others, such as automatic air and gas vents for liquid systems. Visit: <https://isisfluid.com/pure-process/>

J

JSF Aluroofs® - Stand 18

With over 30 years of experience and a presence in more than 90 countries, JSF aluroofs® is a global leader in the design and manufacturing of aluminum covers for storage tanks in sectors such as oil and gas, potable water, wastewater treatment plants, and various industrial applications. Our automated manufacturing process, supported by strong engineering capabilities, allows us to develop customized solutions that ensure maximum efficiency, safety, and quality. We hold international certifications that demonstrate our commitment to quality: UK Marking, CE Marking, and ISO 9001. Among our solutions, alusphere® stands out, a specially designed aluminum dome for hydrocarbon storage tanks. Its advanced technology reduces emissions and evaporation losses, protects stored liquids, allows for quick installation, and offers low maintenance costs, thanks to its lightweight and durable structure. We also offer aluminum internal floating roofs (IFR) in full contact versions with honeycomb panels and pontoon versions, both designed to minimize evaporation and emissions, ensuring efficient installation and high reliability.

K

Kanon Liquid Handling - Stand 17

Kanon Loading Equipment is a Dutch, family-owned company founded in 1978, specializing in high-quality loading arms for Marine, Rail, and Road liquid transfer applications. Serving chemical, petrochemical, pharmaceutical, and storage terminal industries, Kanon is known for reliable, tailor-made solutions engineered for safety, durability, and long-term performance. With over 40 years of experience, Kanon combines solid engineering, transparency, and worldwide 24/7 service support to maximize customer uptime and operational efficiency. Engineered to last, Kanon loading arms meet strict safety and environmental standards while offering an excellent return on investment through extended service life. As a family business, Kanon values long-term partnerships and direct communication.

At the Tank Storage Conference & Exhibition, our UK agent and sister company, Kanon Liquid Handling, looks forward to discussing customized solutions for your transfer operations.

Visit: <https://kanon.uk.com/>

Kinder-Janes - Stand 59

Established in 1957, Kinder-Janes are part of the Atlas Copco Group and the UK Customer Centre for a number of world leading pump, compressor and heat exchanger manufacturers. Over the years, we have gained vast experience and process knowledge enabling us to provide expert advice and solutions for even the most challenging applications. We offer a wide range of equipment and therefore able to offer equipment for most tank storage and transfer applications. We specialise in the supply of zero leakage sealless pump technologies that provide the safety, reliability and low cost of ownership that our customers demand, followed by ongoing aftersales support from our factory trained engineers throughout the operational life. The brands we can offer include Lewa Diaphragm Pumps, Sundyne Pumps and Compressors, Varisco Gear Pumps, HMD and ANSIMAG Sealless Pumps, Wangen Progressive Cavity, Pumps Leistritz Screw Pumps, Nikkiso CMPs and more.

Visit: <https://www.kinder-janes.co.uk>

Knowsley SK - Stand 61

Knowsley SK is renowned for the design and manufacture of innovative firefighting systems for the protection of high value Oil, Gas & Petrochemical installations. The KSK brand is recognised worldwide with an extensive reference list and pre qualifications with the leading IOC's and their subsidiaries. Knowsley SK Ltd has an enviable reputation for finding the complete firefighting solution, incorporating highly reliable systems & equipment for use in all manner of harsh environments. We manufacture and supply products into the -50°C extremes of mid-winter in the Caspian region and also to the +60°C summer heat of the Middle East. The product range includes hydrants, monitors, cabinets and ancillaries plus more sophisticated system packages including deluge skids, foam making equipment and remote operated monitor systems. With a century of expertise, continuous product development, and the backing of a worldwide support network, Knowsley SK is the first choice for high-value asset protection.

L

Lightning Eliminators & Consultants - Stand 19

Lightning Eliminators & Consultants Inc. (LEC) was established in 1971 and specializes in solving lightning-related problems and eliminating lightning-related risk. Our largest customer base is the energy industry. Our Retractable Grounding Assembly® (RGA) is a bonding device made specifically for floating roof storage tanks. Over 18,000 RGA's are in service in over 50 countries. By installing RGA's on a floating roof petroleum storage tank, you will eliminate the leading cause of accidental ignition. LEC's Dissipation Array® System (DAS) is a lightning strike avoidance system that will prevent lightning strikes to the protected structure. Over 3,600 DAS's are currently in service. LEC also provides a variety of grounding and surge protection equipment, plus consulting engineering services in these related fields.

To learn more, please visit: <https://www.lightningprotection.com/>

M

MannTek - Stand 16

MannTek AB of Sweden is the world's leading producers of Dry Disconnect and Safety Breakaway couplings. We manufacture in a wide range of special materials to suit almost any chemical transferred by Sea, Road or Rail today. Our couplings are made to the highest possible standard and are recognised around the globe as 'Best in Class'. Dry Disconnect couplings from Manntek not only prevent spillage they also save money and the environment. Manntek protects human life and the environment.

For more information, please visit: <https://www.manntek.se/>

Merkland Tank - Stand 60

With over 100 years' experience, Merkland Tank is a leading provider of tank cleaning, waste management and bespoke industrial services to the Oil and Gas sector.

Working hand in hand with numerous companies in the sector, we have the extensive experience, skilled team and specialist tanker fleet to deliver a full range of tank services, including tank and pipework cleaning, bespoke industrial cleaning, waste disposal, fuel tank maintenance and fuel tank decommissioning.

We specialise in working in challenging COMAH environments, such as Oil Terminals, Refineries and Fuel Depots and offer site-specific confined space entry, non-man entry, manual cleaning and cutting-edge automated cleaning solutions. Alongside our technical expertise, we are fully committed to safety, sustainability and environmental responsibility, making Merkland Tank your first choice and preferred partner for full-service tank and waste management solutions.

To learn more about our services, visit our website: www.merklandtank.co.uk

MFE Enterprises - Stand 2

MFE Enterprises was founded in 1994 by Bill Duke. MFE Enterprises is a family-owned and operated MFL inspection equipment provider that takes great pride in helping its customers all over the world find the right tool for the job. MFE Enterprises manufactures Non-Destructive Testing (NDT) and Magnetic Flux Leakage (MFL) inspection equipment for both storage tank and pipeline applications. MFE designs equipment for fast and accurate inspections of your plant assets with cutting-edge, lightweight equipment such as the 65 lb Mark IV Tank Floor Scanner and 61lb MFE Edge. MFE Enterprises' inspection equipment is maintained by highly experienced specialists with an extensive industry-specific knowledge base. MFE Enterprises will ensure you receive the right equipment for your specific application, delivered on time and in proper condition, so your inspection is fast, accurate, and cost-effective.

Visit: <https://www.mfeenterprises.com>

MHT Technology - Stand 55

MHT Technology Ltd specialises in advanced tank gauging, terminal automation, and inventory management systems for bulk liquid storage and handling facilities.

As part of the Endress+Hauser Group, MHT serves clients across the oil, gas, and petrochemical industries, delivering high-quality solutions and technical expertise throughout the UK and global markets.

Visit: <https://www.mht-technology.co.uk/>

N

NDT Group - Stand 9

NDT Group is a trusted provider of non-destructive testing (NDT) services across high-risk industries, including oil & gas, petrochemical, power generation, and renewables. Recognised as one of the UK's most responsive and reliable NDT companies, we specialise in advanced inspection techniques that deliver fast, accurate and cost-effective NDT solutions that protect people, assets and the environment in high-risk industries.

Our vision is to be the most trusted partner for high-risk sectors, known for our precision, responsiveness and reporting excellence.

Visit: <https://www.ndtgroup.co.uk/>

Novaflex Group® - Stand 23

The Novaflex Group® is a privately held company committed to continuous advancement in hose, connector and loading solutions through innovation/design excellence and strategic partnership. Headquartered in Ontario, Canada with advanced manufacturing facilities in Canada, USA and UK, Novaflex® under its Novaflex Safe Transfer Systems (Novaflex STS) banner focus on providing the safest and most reliable transfer products available. Products manufactured include: Composite Chemical & Oil transfer hose, 1" – 12" Bore sizes, Rubber Hoses up to 36" Bore, Flexible Duct products in Silicones, Polyurethanes, Thermoplastics and ultra-high temperature resistant materials.

Please visit : www.novaflex.com or www.novaflex.co.uk

P

Petroleum Driver Passport (PDP)

Petroleum Driver Passport

The Petroleum Driver Passport (PDP) Scheme ensures that all UK petroleum tanker drivers are trained and assessed to an industry standard, as originally agreed by industry representatives, regulators and union representatives. It is a voluntary industry scheme, backed by the UK Government, designed and implemented by industry, and overseen by the Downstream Fuel Distribution Forum (DFDF). Via the Scheme, drivers receive a consistent level of classroom/practical training, backed up by a standard and a system of approval, assessment and enforcement. All petroleum tanker drivers should have a PDP card regardless of their employer, type of vehicles, grade(s) of petroleum product, or loading point. It is additional to ADR training and, importantly, it includes the practical assessment of a driver's loading, driving and unloading skills and knowledge annually. The DFDF acknowledges the UK terminals' vital role as the primary point of enforcement for the PDP Scheme.

Visit: <https://www.pdpassport.com/pdpassport/Home>

Protego UK - Stand 39

Since 1954, PROTEGO® has designed, manufactured and supplied flame arresters, valves and tank equipment with the help of more than 600 employees worldwide. We are the technology leader within our area of expertise and provide a global service for our customers which include research and development, application specific engineering, overall protection system design and safety awareness training. Our customers know they can rely on our research capabilities, engineering expertise and high quality products for the up and downstream oil and gas, tank storage, petroleum, chemical, pharmaceutical and bio-energy industries.

For more information, please visit: <https://www.protego.com/>

R

Radar Tank Gauging - Stand 26

Radar Tank Gauging Ltd is the distributor for Rosemount high accuracy tank gauging systems for any facility storing high value liquid products. The system is based upon radar tank gauges offering high accuracy required to meet HM Customs & Excise requirements. In addition to no moving parts and accuracy to 0.5mm these gauges can also be supplied with emulation output cards enabling them to emulate old servo type gauges.

Rosemount really takes tank gauging to another level, enabling any facility to be better equipped to handle the ever-increasing demands on efficiency, safety and accuracy. It is a complete and flexible tank gauging system, based on the open industry standard FOUNDATION™ fieldbus. The Rosemount Tank Gauging system also supports the Emerson's Smart Wireless solution, which is based on WirelessHART™, the emerging industry standard for wireless field networks. Visit: <http://www.radartg.com/>

RAS - Stand 42

RAS Limited is an independent team of experts in high hazard risk management, supporting clients to navigate risk with clarity. Our award-winning team of Process and Technical Safety Consultants have partnered with leading companies in the energy, pharmaceuticals, and specialty chemical sectors across the world for over 30 years. Understanding and facilitating the effective management of risk is our core business. The key to the successful identification, assessment and management of risk is engagement with the right people, using the right processes at the right time. RAS can support in this by offering a full range of process and technical safety support at all stages of a plant's lifecycle. We can support in specific project scope such as Hazard Identification, Human Factors and Risk Assessment (Safety, Environment, NaTech), through to full regulatory support in areas such as COMAH and DSEAR. Visit: <https://www.ras.ltd.uk/>

Reynolds Training Services - Stand 47

Reynolds Training Services delivers world-class training, assessment, competence management and consultancy to the Bulk Storage and Energy Infrastructure Sector. We've shaped safety standards for decades. As Associate Members of the TSA, we offer GQA, NEBOSH, IOSH and SIAS qualifications. Training is delivered through a blended model - on site, in the classroom and at the NCPM: the UK's only fully operational process plant and tank farm built for education. Learners can step into our fast-developing VR training platform, Virtual Reynolds. We're proud to be working with SIAS and the TSA on a long-term campaign promoting industry priorities and championing workforce development, tackling Energy Transition, Digitalisation, Workforce Change and Competence Development through Career Pathways. From onboarding to lifelong careers, we help people and organisations stay compliant, capable and future-ready.

Because shaping a safer industry doesn't happen alone. We're **Shaping Competence Together.** reynoldstraining.com

ROSEN - Stand 58

ROSEN

empowered by technology

The ROSEN Group is a leading global, data-enabled provider of cutting-edge solutions and services in all areas of the integrity process chain. ROSEN is today a technology group that operates in 110+ countries with 4,000+ highly qualified employees. ROSEN's products and services:

- Inspection of critical industrial assets to ensure asset availability, reliable operations of the highest standards and effectiveness
- Customized engineering consultancy providing efficient asset integrity management
- Production and supply of customized novel products and systems
- Market-driven, topical state-of-the-art research and development providing "added-value" products and services

We are empowered by technology

As a global technology company, we focus on empowering our customers to make the best decisions for their critical industrial assets. With a portfolio of highly advanced proprietary diagnostic technologies, a vast and unique data set, and industry-leading software solutions combined with integrity engineering consulting services, we offer a unique synergy that allows us to transform data into knowledge. Knowledge enables smarter decision-making and delivers a comprehensive understanding of asset safety, lifetime, and performance.

Scully - Stand 29

Scully with its exceptional industry experience for over 90 years, designs and manufactures overfill prevention, static grounding, vehicle identification, vehicle to terminal communication, and product transfer verification systems for the safe, efficient, and reliable storage and transfer of hazardous and non-hazardous liquids.

Dynacheck®, a patented self-checking and failsafe technology has enabled Scully systems to offer the highest levels of assurance in protecting plant, people, and the environment. Scully a worldwide respected brand, operating in petroleum, chemical, distilling, aviation, food, and military sectors. Commitment to excellence, quality, and longevity, affirming our role as global leader in safe and efficient product transfer.

SGS - Stand 44

SGS is the world's leading Testing, Inspection and Certification company. We operate a network of over 2,500 laboratories and business facilities across 115 countries, supported by a team of over 100,000 dedicated professionals. With more than 145 years of service excellence, we combine the precision and accuracy that define Swiss companies to help organizations achieve the highest standards of quality, compliance and sustainability. Our brand promise – *when you need to be sure* – underscores our commitment to trust, integrity and reliability, enabling businesses to thrive with confidence. We proudly deliver our expert services through the SGS name and a portfolio of trusted specialized brands, including Applied Technical Services, Brightsight, Bluesign and Nutrasource. SGS is publicly traded on the SIX Swiss Exchange under the ticker symbol SGSN (ISIN CH1256740924, Reuters SGSN.S, Bloomberg SGSN SW). Visit: <https://www.sgs.com/en-gb>

Sherwin-Williams Protective & Marine - Stand 41

For over 150 years, Sherwin-Williams has been a trusted partner in delivering smarter, proven asset protection. Our Protective & Marine division provides a world-leading portfolio of tech-led, high-performance coatings and systems to protect onshore and offshore energy assets from corrosion, fire, chemical attack, extreme weather and everyday wear and tear. As a leading coatings provider in the tank storage market, we offer a comprehensive range of tank linings built on decades of proven performance. These solutions deliver reliable protection against aggressive storage materials and elevated temperatures.

We also address broader operational needs: our Heat-Flex® Thermal Insulative Coatings help reduce energy loss, mitigate or eliminate corrosion under insulation (CUI), and provide critical personal protection for nearby personnel. Our products are supported by our expert technical advisory teams, ready to help you identify the most effective coating solutions tailored to your specific requirements.

Visit: <https://industrial.sherwin-williams.com/emeai/gb/en/protective-marine.html>

SIAS - Stand 46

At SIAS, we exist to drive bold, meaningful change.

We believe in breaking away from outdated traditions to create a world where skills and innovation move at the speed of industry. As a forward-thinking Awarding Organisation, we're not just preparing learners for the future – we're shaping it. Our purpose is to power the next generation of STEM talent to lead the way in future technologies, sustainable solutions, and the industrial transition. Partnering with employers and training providers, we focus on what really matters – unlocking potential, sparking progress, and delivering impact that lasts. SIAS isn't just an Awarding Organisation – we're a movement. A commitment to progress. A promise to inspire.

Together, let's shape the future of skills. Together we are #AlwaysMovingForward

Visit: <https://siasuk.com/>

SLR - Stand 7

SLR is a leading global environmental and advisory consultancy, with a team of 4,500+ talented professionals operating from a network of offices in Europe, the Americas, Asia-Pacific, the Middle East, and Africa.

Our purpose - Making Sustainability Happen - means delivering outcomes that are grounded in evidence, shaped by experience, and built to last. Our team of scientists, engineers, economists, data modellers, and technicians work across our clients' full sustainability journeys, from strategy through to on-the-ground project planning, execution and ongoing operations, all supported by robust data and science-based modelling. Guided by our philosophy of Rational Sustainability, SLR specialises in the energy, mining, finance, industry & technology, government & infrastructure, and built environment sectors. Operating across more than 50+ technical disciplines, we're helping a growing base of business, regulatory and government clients navigate the ever-shifting context of sustainable business. Visit: <https://www.slrconsulting.com/>

Smartflow - Stand 50

Smartflow is the digital platform behind faster, safer ship-shore operations at tank terminals worldwide. From vessel clearance and planning to ISGOTT and other ship-shore checklists, Smartflow replaces paper, spreadsheets, and scattered emails with one connected system — giving Loading Masters real-time visibility from vessel announcement to departure, and every approval timestamped and audit-ready.

Beyond the jetty, the same platform supports the full terminal operation: truck and railcar handling, operator rounds, shift handovers, commissioning, maintenance, and safety inspections. Configurable workflows adapt to each site's procedures and integrate with existing ERP and CMMS systems, so terminals can start where the pain is sharpest and expand from there.

Visit us at TSA 2026 to see how Smartflow helps terminals turn around vessels faster, manage compliance with confidence, and bring every stakeholder onto one platform.

Smarter. Safer. Check. smartflowapps.com

Square Robot - Stand 32

Founded in 2016 and headquartered in Boston, Massachusetts, Square Robot is transforming aboveground storage tank (AST) inspections through autonomous robotics. Our submersible robots perform in-service inspections, allowing operators to keep critical assets online while improving safety, compliance, and operational efficiency. Equipped with advanced non-destructive testing (NDT) sensors and autonomous navigation, our robots deliver accurate, repeatable data that identifies corrosion, anomalies, and damage without taking tanks out of service. This reduces downtime, lowers inspection costs, and supports informed asset management decisions. Leading companies across the oil and gas, petrochemical, energy, and industrial manufacturing sectors rely on Square Robot to protect critical infrastructure and optimize inspection workflows. Safety remains at the core of everything we do. By replacing manual tank entry with autonomous inspections, we remove personnel from hazardous environments and significantly reduce operational risk. Our team of robotics engineers, data scientists, and inspection specialists is committed to advancing inspection technology through safe, efficient, and reliable solutions.

Visit: <http://www.squarerobot.com/>

Stäubli - Stand 5

Stäubli supports the chemical industry with advanced connection solutions designed to enhance safety, reliability, and operational efficiency. Originally founded in 1892 in Switzerland, the company has grown into an international group, operating in 28 countries. Its portfolio includes dry disconnect couplings, safety breakaway systems, and multi-connector solutions that help maintain product integrity while reducing risk in demanding environments.

Backed by strong engineering expertise, Stäubli works closely with chemical manufacturers to deliver high-performance solutions that support safe, efficient, and sustainable operations.

T

Teamwork Security and Training Services - Stand 15

Teamwork Security and Training Services Ltd was formed in 2004 in response to the demand for Port Facility Security Officer training following the introduction of the ISPS (International Ship and Port Facility Security) Code under amendments to the 1974 SOLAS Convention. Teamwork Security and Training Services delivers complete ISPS support; audits, ISPS compliance, security exercises, as well as Wharf Approval and ADR support packages and can provide a high-level security guarding service and drug and alcohol testing to Port Facilities. They also deliver training and are approved by the Department for Transport to deliver Port Facility Security Officer and refresher courses along with Harbour Master's investigators courses, staff Security Awareness and Search Training courses, consistent with the latest Port Facility Security Instructions as issued by the DfT.

For more information visit: teamwork-security.co.uk - Email: enqs@teamwork-security.co.uk or call: 01752 425424

TestTex NDT - Stand 45

Over 25 Years of Excellence

For more than 25 years, TestTex NDT has been delivering trusted inspection and Asset Integrity Services across the UK. As a leading specialist in the inspection of storage tanks, pipelines, pressure vessels and boilers, we continue to support clients with safe, compliant and efficient operations.

Our experienced teams provide a comprehensive range of services including Non-Destructive Testing, API and EEMUA 159 inspections, site surveys and written schemes, Risk-Based Inspection (RBI), tank cleaning and repairs, laser surveys and tank calibration, drone surveys and wider Asset Integrity Solutions. As a UKAS 17020 accredited Type A Inspection Body, TestTex is recognised for technical excellence, impartiality and delivering clear, actionable reporting that helps clients maintain the highest standards of safety and compliance. Whether supporting a single asset or a large-scale facility, TestTex NDT remains a reliable partner for operational excellence and long-term Asset Integrity. Visit www.testexndt.co.uk to find out more.

U

UAB-Online - Stand 3

UAB-Online is a cloud-based SaaS platform that enables digital collaboration across liquid bulk (and dry bulk) logistics. Founded in 2010, UAB-Online connects terminals, vessels, shipping companies, agents, traders and surveyors in one shared workspace to streamline the pre-arrival and port call process. The platform helps users create, exchange, sign and store operational and regulatory documents in a single online dossier, reducing email traffic and manual handovers. By standardising workflows and providing real-time visibility for all stakeholders, UAB-Online improves reliability, transparency and operational control before a vessel arrives and during cargo operations. The result is safer and more efficient coordination, stronger compliance with industry and regulatory requirements, and less administrative burden for teams on both shore and ship.

By reducing delays and idle time in port, UAB-Online also supports more sustainable operations and contributes to lower emissions across the maritime supply chain. For more information, please visit <https://uab-online.com/>

V

Vega Controls - Stand 13

VEGA are world-leading manufacturers of level measurement, point level detection and pressure instrumentation, offering safe, simple and reliable measurement, control and switching solutions for tank storage applications. We are delighted to be making our debut at TSA Conference & Exhibition—come and find us at Stand 13 on 17th September. Visit our team to discover how VEGA instrumentation can optimise your processes, from non-contact radar level transmitters, including the VEGAPULS 6X, to guided wave radar transmitters for demanding applications, and high and low point level detection with SIL conformance. VEGA's pressure portfolio covers absolute, gauge and differential transmitters for accurate process pressure measurement. For remote monitoring requirements, the VEGAPULS Air delivers wireless, non-contact radar measurement as part of an IIoT-ready inventory solution. All products are supported by experienced UK engineers, a three-year UK warranty, and modular design that simplifies installation, maintenance and ensures long-term performance. Visit: <https://www.vega.com/en-uk>

Voovio - Stand 24

Voovio's simulation and productivity tools for industrial field operations save money, lower operational risk and reduce environmental impact. Thanks to our intuitive and user-friendly solution, we boost performance, reduce downtime, protect the environment and solve industrial training and knowledge transfer challenges.

Voovio's power lies within its proprietary 'Enhanced Reality' technology, which brings the real production environment to any screen via our digital replica and procedure simulation solution. Unleash 'The Hidden Plant' through improved operating discipline and ensure that your organization sustains a highly skilled, flexible workforce.

Visit www.voovio.com to find out more.

Wood Group - Stand 30

Wood Group UK Ltd – Safe and efficient delivery of Storage Tank solutions

Wood is a global leader in storage tank engineering, construction, repair, and integrity management, supporting assets across their full lifecycle. With over 40 years of specialist tankage experience, we design, build, inspect, and refurbish all tank types to API, EN and EEMUA standards, including major floating and fixed roof installations.

We operate safely and efficiently through proven execution models, helping operators minimise downtime, extend asset life, and improve performance across refineries, fuel terminals, petrochemical sites, and industrial facilities.

Our expertise spans turnkey new build delivery, complex repairs, welding engineering, integrity assessment, and advanced construction methodologies.

G R Carr

Mechanical Engineering Services

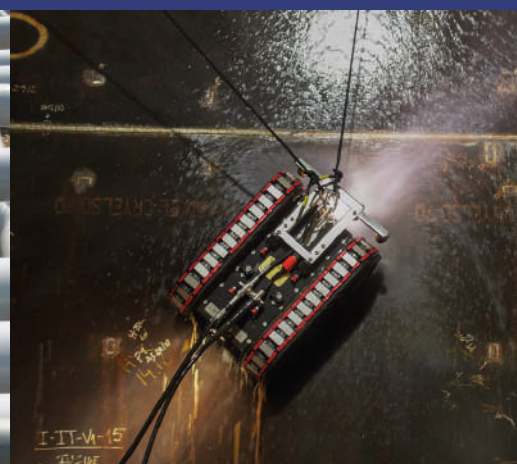

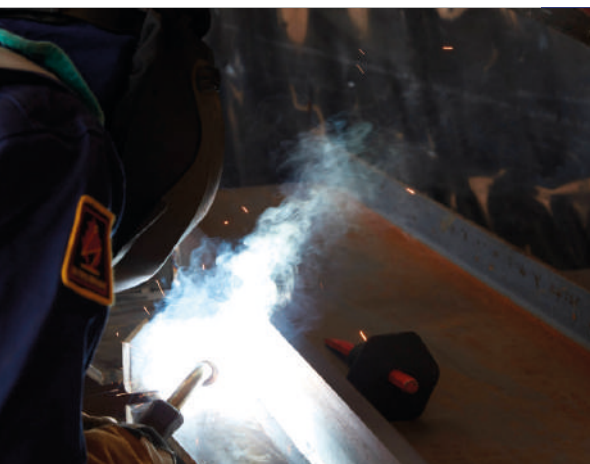

Specialists in Mechanical Engineering for Industrial Pipework, Storage Tanks & Process Systems

Based in Essex, we have been safely delivering the highest integrity and quality sensitive projects for top tier COMAH sites since 1970.

From our 4.5 acre facility we carry out both off-site and on-site projects across the Oil & Gas, Nuclear, Aviation, Energy, Utilities, and Infrastructure sectors.

Services:

- **Pipework Fabrication & Installation**
 - ASME & PED
- **Structural Steelwork Fabrication & Installation**
 - up to and including BS EN 1090 Exc 4
- **Tank Modification, Maintenance & Repair**
 - EEMUA & API
- **Robotic Tank Cleaning**
- **Pressure Testing Pipework & Tanks**
- **NDT**
- **Abrasive Blast Cleaning**
- **Protective Coating/ Painting/Lining systems**
 - ICATS & ICORR
- **Commissioning**
- **Contract Lifting**
- **Mechanical Plant Installation**

Meet our Chair, Speakers and Panellists

This year's dynamic conference programme offers a full day of thought-provoking keynote speeches, expert presentations and panel discussions. The agenda explores themes including innovation, productivity, economic growth, international trade, global trends, energy security, process safety, and more. All presentations will be available for download after the event at www.tankstorage.org.uk/conference-exhibition.

Greg Emmenis – Publisher, Storage Terminals Magazine

With over two decades of dedicated service to the tank storage industry, Greg Emmenis has established himself as one of the sector's most passionate and committed voices. As Publisher of Storage Terminals Magazine and a number of other leading publications, Greg works closely with a portfolio of more than 200+ customers across the Tanks and Terminals sector, spanning Tank Operators and specialist Service Providers alike. Throughout his career, Greg has built meaningful relationships with key events and associations around the world, including ILTA, NISTM, API, Tank Storage Association, and many more. Greg has a genuine love for the industry and the people within it. He remains deeply committed to ensuring that Storage Terminals Magazine continues to serve as a definitive voice for the sector, connecting, informing, and championing the industry he cares so much about.

Mark Waddington – CEO, Channoil Energy

Mark is CEO of Channoil Consulting Limited. Mark is a senior downstream energy consultant with over 35 years' commercial experience, covering refining, trading, supply and commercial sales. Since 2017, Mark has been working for Channoil and in 2023 became CEO, focussing on trading, commercial and wholesale markets in EMEA. Mark is an expert on oil markets and pricing and has extensive advisory experience on downstream asset investment and commercial strategy. Channoil provides advisory, training and expert report services across the fuel supply chain. Channoil's recent work in the UK includes supply and refining resilience assessments, surveys of the commercial storage market, market entry studies for renewable fuels and commercial analysis to support major contract negotiations.

Edward Gill – North West Europe Communications & Public Affairs Lead – Exolum

Edward Gill leads Communications and Public Affairs for Northwest Europe at Exolum, overseeing stakeholder engagement, corporate communications, government relations and strategic positioning across the UK and wider region. Based in London, he works with governments, regulators, industry partners, communities and media to support critical energy infrastructure and the transition to lower-carbon fuels. With extensive experience in infrastructure, energy and transport policy, Edward's work focuses on creating the conditions for investment in the logistics networks needed to support both today's fuel requirements and the fuels of the future. He has particular expertise in sustainable aviation fuel (SAF), carbon capture and storage (CCUS), and the role of shared infrastructure in enabling the energy transition.

**Matt Wilson - Head of New Energy Markets - Navigator Terminals**

Matt Wilson is Head of New Energy Markets at Navigator Terminals, where he leads the development of strategic growth opportunities across low-carbon energy infrastructure, including carbon capture and storage (CCS), sustainable aviation fuel (SAF), biomethane, hydrogen, and other emerging energy vectors. A Chemical Engineering graduate from Teesside University, Matt has over 15 years of experience in the energy, chemicals, and process industries. His role focuses on identifying, developing, and delivering projects that support industrial decarbonisation while creating long-term value for customers, partners, and stakeholders. At Navigator Terminals, Matt has been instrumental in advancing major energy transition initiatives, including CO₂ import and export infrastructure, biomethane production opportunities, and sustainable fuels logistics. He regularly engages with industry leaders, policymakers, and regional stakeholders to help shape practical pathways to net zero. Alongside his professional role, Matt is currently studying for an MBA at Durham University Business School.

**Kim McCann - Global Head of Energy Advisory - SLR**

Kim McCann is SLR's Global Energy Advisory Director, specialising in the energy transition with a focus on hydrogen, derivatives, and value chains. She is a dynamic executive with a proven track record of delivering strategic value and driving P&L growth. Her blend of technical expertise and strategic leadership has driven innovative investments in new technologies and markets. Since 2006, Kim has navigated the energy transition, helping clients secure funding for hydrogen and Sustainable Aviation Fuel (SAF) projects and guiding investors on new energy technologies. She collaborates with government, investors, and corporate clients to design future energy business models, bringing 13 years' experience as a Senior Exec at Shell where she led its aviation business.

**Major Andrew Clarke - Fuels Infrastructure Specialist, Royal Engineers**

Andrew is a Chartered Chemical and Explosives Engineer with over 25 years' experience in global oil and gas operations, complemented by 32 years of distinguished service in the British Army Reserve. He specialises in fuels infrastructure, counter-terrorism and bomb disposal, and is currently in a specialist team supporting fuels infrastructure in both domestic and deployed environments. His operational military experience includes leading Explosive Ordnance Disposal operations in Iraq and managing engineering operations and logistics for a 600-strong Royal Engineers force in Helmand Province, Afghanistan, advising senior commanders on complex projects in hostile environments. In his civilian career, Andrew holds senior leadership roles in bp, currently leading HSE at the Rumaila oil field in Iraq. He is recognised for decisive leadership, crisis response, and driving sustained safety & sustainability performance in high-hazard, multinational settings.

Chris Griffin-McTiernan - Director, Chemicals, Explosives and Microbiological Hazards Division - HSE

Chris Griffin-McTiernan was appointed to the role of Director of HSE's Chemicals, Explosives and Microbiological Hazards Division (CEMHD) in December 2025. The Division is responsible for the regulation of onshore major hazard businesses and covers those sites that store or handle chemicals, explosive materials and microbiological agents. Chris brings with him a wealth of experience to the role. From January 2023, he held the post of Deputy Chief Inspector (DCI) in the Building Safety Regulator (BSR). In addition to his time in BSR, Chris has leadership experience from working in HSE's former Construction Division, where he led the engineering specialist and divisional support functions. Before joining HSE Chris's wide-ranging experience saw him working in the Foreign Commonwealth and Development Office, the Home Office and a period of time serving in the Royal Air Force.

Chris Jenkins - Deputy Director Energy and Manufacturing Industries - Environment Agency

Chris is a Deputy Director at the Environment Agency, where he leads the national Energy and Manufacturing Industries portfolio. He has been with the Agency for nearly two years and brings a strong background in government policymaking, science, and programme delivery within the environmental sector. Chris is focused on achieving positive environmental outcomes while supporting industry resilience and ensuring preparedness for future challenges

Lewis Barton - Global Service Manager, Non Intrusive Pipeline Assessment - ROSEN

Lewis has been part of ROSEN for the past 15 years providing corrosion management and engineering consultancy. He has been led a wide variety of work scopes across the world ranging from flow assurance to pipeline inspection; however, has always specialised in unpiggable pipeline solutions. Lewis now leads the ROSEN above ground services portfolio, specialising in the non-intrusive inspection of pipelines and other assets using novel and conventional technologies.

All presentations will be available for download post event at

On the road to the future? We've got smart measurement technology.

VEGAPULS Air 41

Autarkic, continuous level measurement
for liquids and bulk solids.

Everything is possible. With VEGA.

- Simplified inventory monitoring through VEGA Inventory System – accurate data acquisition, clear tank visualisation and streamlined logistics planning
- Exact measurement results independent of medium, process and environmental conditions
- Maintenance-free operation due to non-contact 80 GHz radar technology

Conference's Food & Drink

At this year's Tank Storage Conference & Exhibition, the excellent catering staff at the Coventry Building Society Arena will be providing attendees with an inclusive buffet lunch as well as refreshment breaks throughout the day.

On arrival, you will be welcomed with a breakfast selection of tea, coffee and danish pastries, followed by a mid-morning refreshment break at 11.30am.

Lunch will be served between 12.30pm and 2pm. This year, our lunch is **sponsored by Aquilar**, a distributor and manufacturer of leak detection equipment and solutions.

Mineral water will be freely available throughout the day.

The Tank Storage Conference & Exhibition's organisers would like to take this opportunity to thank this year's catering sponsor, Aquilar, and the team at the Coventry Building Society Arena for their fantastic service and assistance.

Lunch Menu

Selection of Hand Cut Sandwiches – including a Gluten Free and Vegan Selection

Heritage Tomato and Bocconcini Tart

Kombucha Salad – Cherry Tomato, Cucumber, Red Onion (GF/VE)

Salt and Pepper Wedges (GF/VE)

Hog Roast Sausage Roll, Apple and Stuffing

Lemon Drizzle, Almond and Pistachio Cake

Fuel Oil News

Fuel Oil News: Supporting Today. Informing Tomorrow.

Fuel Oil News is the trusted voice of the UK and Ireland's fuel storage, marketing and distribution industry. The leading community platform for 50 years, we deliver essential news, expert insight and practical guidance through print and digital channels, to help industry businesses navigate the evolving energy landscape.

Addressing the industry's immediate needs, we also encourage progress in the transition to low-carbon solutions – providing the knowledge and support businesses need to thrive today as well as in a cleaner energy future.

VEDIA

Storage Terminals Magazine

Published quarterly, Storage Terminals Magazine is a leading business publication for professionals across the global bulk liquids storage industry, including executives, engineers, technicians, and senior decision-makers. It delivers high-quality editorial content, expert insights, and comprehensive international news to help companies operate more efficiently, safely, and profitably in a competitive market. The magazine also serves as a powerful marketing platform, connecting suppliers directly with a highly targeted audience of tank storage owners, terminal operators, and buyers of equipment and services. Through both print and digital channels, it ensures strong visibility and engagement across the industry worldwide. For advertising opportunities and to reach your target market, contact **Greg@storageterminalsmag.com** or **Tracey@storageterminalsmag.com**.

Tank Storage Magazine

Tank Storage Magazine is the bulk liquid storage industry's leading and most-established publication. Published five times a year, every edition of Tank Storage Magazine features global news, market insights, and exclusive interviews from terminal operators around the world. Tank Storage Magazine is read by CEOs, terminal managers, business development managers and procurement managers within the oil, gas, chemicals and renewables markets.

SETTING THE STANDARD FOR ENVIRONMENTAL RESPONSIBILITY

ABOVEGROUND STORAGE TANK SOLUTIONS

At HMT, we partner with our customers to optimize tank operations, reduce emissions, and provide solutions that enhance facility efficiency, productivity, and profitability. With a commitment to innovation, we engineer products specifically crafted to enhance tank working capacity and prolong tank lifespan.

Aligning with our mission of sustainability, we offer a comprehensive suite of services that include Design, Inspection, Repair, and Maintenance of aboveground storage tanks. We are ready to assist and ensure a seamless integration of efficiency and environmental responsibility in every aspect of your operations.
