## **Our Business**

px Group delivers innovative management and engineering services for safety critical environments and mission critical infrastructure. We can offer these solutions through our team of experts and high-quality service offerings. We always operate with integrity and responsibility, and provide clients with results-focused solutions.

## **The Opportunity**

We are now recruiting for an exceptional Plant Manager to join, engage and lead our CHP plant team at Fellside in delivering exceptional safety and operational performance and client satisfaction.

The plant provides critical process steam to the Sellafield nuclear reprocessing facility and exports electricity to Sellafield and the National Grid. The original configuration was three GE Frame 6581B gas turbines operating on natural gas as a primary fuel with distillate back up fuel available from on-site storage facilities. Two of the gas turbines have now been retired due to strategic change and additional dual fuel steam raising boilers have recently been commissioned, with a further boiler park facility currently under construction.

In your role, you'll lead plant updates and improvements, ensuring solution delivery to improve asset integrity, optimise plants performance and minimise fuel consumption. In 2010 px Group was awarded the prestigious RoSPA President's Award, in recognition of Fellside CHP's consistently high safety standards. We're aiming to repeat this in 2021 having received a further nine consecutive annual RoSPA Gold medals.

You'll also have overall responsibility for the effective development, management and performance of key client relationships and contracts. And, be the site 'Accountable Person', ensuring compliance to and delivery of the px Group Operating Standard through your leadership, direction and management of strategy, actions and results, successfully leading, supporting & managing the Fellside management team in their implementation of these philosophies and strategies.

## **Minimum Requirements:**

- HNC/D qualification in engineering / process discipline.
- NEBOSH General Certificate.
- Contribution & experience in 24/7 operations or engineering environments at a senior manager level including SHEQ and operational, people, finance, technical, change & improvement management & improvement.
- Effective and responsive client & contract management balancing business & customer requirements.
- Experience of power station operations, legislation & codes of practice management.
- Be able to demonstrate business planning: development & implementing strategies & projects, etc.
- Experience and knowledge of UK / European legislation & best practice.

***In order for your application to be progressed, all candidates must meet the minimum requirements of the job role person specification.***

## **More information:**

Can be found in the job description & person specification for this role/position.

**Closing date: 7<sup>th</sup> February 2021**

***Please note this role may close early or be extended depending on the volume of applications.***
