Process Safety Technical Authority

June 2021

Our Business

px group is an award winning and ambitious fully integrated infrastructure solutions business, with over 25 years of experience. We provide innovative operations management, engineering services and energy management solutions to partners in high hazard, highly regulated industries. Our focus is improving operating performance of commercial and industrial facilities, with zero harm to people, environment asset & reputation.

The Opportunity

Due to the Company's continuing and planned for growth we are currently seeking a Process Safety Technical Authority to join our TA team. Passionate about your subject, able to engage and practically share your knowledge, skills and experience with employees and third parties enabling them to deliver process safety excellence, this is an outstanding opportunity for an Operations focussed Process Safety professional looking to take the next step in their career and grow themselves as we grow our business.

Your main responsibilities are:

- Ensure Process Safety engineering risks within px Operations are understood & managed meeting best & regulatory engineering practices, standards and processes across all operations
- Lead process assurance activities delivering compliance
- Provide Process Engineering support, guidance & action completion across the px business.
- Lead cross px discipline engineering networks

Although your contractual basis is at our head office in Stockton on Tees, as this is a corporate role with some travel, in line with our agile working practice we would consider applications from around the country.

Minimum Requirements:

To be considered for the role as a minimum you'll have the following knowledge, skills & experience:

- Bachelor's Degree or equivalent in Process Engineering discipline
- Working towards or Chartered /equivalent professional status.
- Operational work experience within 24/7, high hazard & highly regulated Operational assets.
- Knowledge & application of:
    - COMAH (Process Safety & Predictive Guidance)
    - HAZID & HAZOPs
    - Hierarchical approach to Major Accident Hazards
    - * DSEAR Regulations
    - * Process Hazard Review

In order for your application to be progressed, all candidates must meet the minimum requirements of the job role person specification.

More information:

Can be found in the job description & person specification for this role/position.

Closing date: 30th June 2021

Please note this role may close early or be extended depending on the volume of applications.
