

Our Business

px group is a fully integrated infrastructure solutions business, with over 25 years of experience. We provide innovative operations management, engineering services and energy management solutions to partners in high hazard, highly regulated industries. We focus on improving operating performance with zero harm to people, environment asset and reputation. We do this by focusing on 5 key delivery areas: Operations & Maintenance, Engineering Services, Energy Trading, Digital Transformation & Due Diligence.

The Opportunity

px group ('px'), own and operate the 370 acre top tier COMAH site Saltend Chemicals Park (SCP) - near Hull. With a cluster of world-class chemicals and renewable energy businesses, SCP is strategically positioned on the UK's busiest ports complex – and is a location of world-scale manufacturing, operational, engineering and service excellence and, innovative technology, with ambitious growth and expansion plans.

Due to retirement, we are looking for a SHIFT SITE MANAGER to further strengthen our SCP Operations management team. In this key role you will:

- Lead and engage an assigned shift team to deliver the Annual Delivery Plan through safe, reliable and efficient operations, excellent personal performance, standards and service delivery.
- Oversee SCP's daily operations of Services and Utilities, ensuring effective delivery for our site partners in line with agreed contractual requirements.
- Undertake the role of Site Incident Controller for all emergency responses to be the single point of accountability for ensuring partner compliance with site emergency response standard.

To be successful, you're able to engage and develop positive working relationships, adapting, contributing and working effectively with other members of the px SCP team and our SCP site partners. You're also committed to developing yourself and delivering operational and business improvements and innovation. You will be supported in doing this through completing a comprehensive development programme working on days and shifts to expand your knowledge, skills and experience before being assigned your own shift team.

Minimum Requirements:

- HNC in production or engineering discipline or prepared to work towards it.
- Successful contribution & work experience in a 24-hour industrial process to include:
 - Application of SCP operational processes & remit, site partners operational processes & contacts.
 - Team management, development, performance, welfare & standards.
 - Working cross functionally to deliver policies, business development plans & KPIs.
 - Providing constructive Ops. input ensuring ops requirements are understood, heard & incorporated into cross-dept. meeting, plans & projects.
 - Development & implementation of strategies, projects & initiatives.
 - Making practical recommendations re safe, reliable & efficient standards in all operating scenarios.

In order for your application to be progressed, all candidates must meet the minimum requirements of the job role person specification.

More information: May be found in the job description & person specification for this role/position.

Closing date: 28th November.

Please note this role may close early or be extended depending on the volume of applications.
