# The Tank Storage Association

---

The Tank Storage Association is the trade association representing the interests of over 60 member companies engaged in the storage of bulk liquids and the provision of products and services to the sector. Our members provide and support an essential interface between sea, road, rail and pipeline logistics for a diverse range of essential products, including transport and heating fuels, chemicals, animal feed and foodstuffs. In the process, they are responsible for the direct employment of around 4,000 highly trained, specialised people. The association also takes a leading role in safety, encouraging cross-sector cooperation and knowledge transfer via a number of fora including the COMAH Strategic Forum and Process Safety Forum.
